

NIKOLAY BORSIN

FRONTEND DEVELOPER

ABOUT ME

And I'm a Front-end developer. My path in IT started in 2020 when I became interested in this field and began studying it independently. I started my journey with Dmitry Valak's "BrainsCloud" and completed courses on the Udemy platform, which helped me gain a solid foundation and skills in development for further exploration of the field. In 2022, I decided to take development seriously and enrolled in an IT incubator, where I continue to enhance my skills and learn new technologies, aiming for fullstack development.
